For Immediate Release

“Peelle now offers Modernization Quotes from its extensive database. During the past 101 years Peelle has been furnishing freight elevator doors, gates, and car enclosures throughout the world. Some of this equipment is in need of replacement or modernization; programs such as adding a Peelle Protector light curtain, installing a Peelle door safety device, motorizing existing manual doors and/or re-motorizing the existing non-Peelle doors and much more. Peelle welcomes the opportunity to research our old job records and quote on modernization projects for the elevator contractor on behalf of the building owner. Modernization enhances the freight operation, updates equipment to present code and/or improves safety.
