### **For Immediate Release**

“Peelle introduces its new Hoistway Door Unlocking Device for the modernization market. This unlocking device complies with ASME A17.1 requirement 2.12.6.2.3, which requires the unlocking device to be self-closing, self-locking when a releasing chain is kept under a locked panel. The Peelle Unlocking Device is suited for any freight door installation; Peelle, Courion, EMS, Security, Otis, Harris Preble, Guilbert, etc. The simple yet effective design allows the cover to close by gravity, regardless of cover position.

**The Peelle Company Limited** (Canadian & International Sales)
