For Immediate Release

Peelle is pleased to introduce their *new* **Wireless Controller**. The new control system provides constant **Wireless Communication** between all landing doors and car door (per line) creating a more reliable, truer, operation; **wiring time has been reduced by 40-50%**. The Control system also provides **Closed Loop Feedback** and true door positioning eliminating the need for limit switches and sensors, **another time savings**. The **Variable Voltage Variable Frequency Drive**, utilizing the latest inverter technology and motor protection, is **self learning – self adjusting**

which creates a smooth open and close sequence. It's also **100% Machine Room Less**, no bulky door controllers taking up valuable room. The wireless door controller uses less energy than traditional start/stop methods and requires less material for installation, so it's **Green** too! An **LCD Display** provides on-board diagnostics displaying live status of all control system equipment. The controller comes ready for use, just plug in the door hardware and turn on the power, true **Plug and Play**. The new Peelle Wireless Controller will be available 1/1/2010 on a limited basis and only for those applications that require **Slave Mode**. It will be provided as standard equipment at the same price level as Peelle's current control system. For more information email sales@peelldoor.com.

A graphic with a dark background and a large, faint circular arrow icon. It features six blue square icons with white symbols, each with a label below it:

- Wireless: A radio tower icon.
- VVVF Drive: A sine wave icon.
- Closed Loop: A circular arrow icon.
- Plug & Play: A power plug icon.
- Self Learn: An icon of a person reading a book.
- Machine Room Less: An icon of gears with a diagonal slash through them.

At the bottom left is the PEELLE logo (red and white). At the bottom right, the words "WIRELESS CONTROLLER" are written in large, bold, blue capital letters.
