

Put your
Elevator Door Problems
up to Peelle

PEELLE

COUNTER-BALANCED TRUCKABLE

FREIGHT ELEVATOR DOORS

Guard Against Fires and
Accidents — Assure Safety!

THE steel-framed panels of PEELLE Counterbalanced Truckable Freight Elevator Doors, the standard of fire retarders; render the elevator shaft free from drafts and prevent fires, where an open shaft equipped with gate-like doors aids the spread of fire.

Not only do PEELLE Doors minimize the fire hazard, but they eliminate many other costly accidents. The safety, the operating ease, the saving of floor space, and the long life of PEELLE Doors make it economical to select this superior equipment. PEELLE Doors operate vertically by electricity or manually.

Do not be misled by imitations called "PEELLE Type", "PEELLE Style," etc.

Have one of our engineers call to help you with your elevator door problems, or write for our catalogue today.
