The Right Fit

Door Safety Device

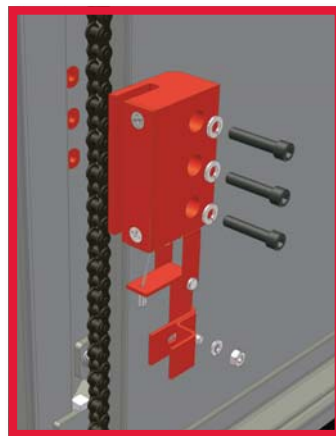

Design

The DSD's compact design, allows installation directly to the door or gate panel behind the chain, on virtually any new or existing Peelle door and car gate.

Positive Force Technology

Peelle's Door Safety Device is always in a positive state of readiness, applying force to the chains at all times. This constant monitoring state allows the Door Safety Device to engage whenever the chain becomes slack.

Installation

The DSD installs quickly and easily onto virtually any new and existing Peelle freight door system.
