

Quiet Cam

Power is slowly ramped to the Retiring Cam face to achieve smooth and quiet operation eliminating cam drop.

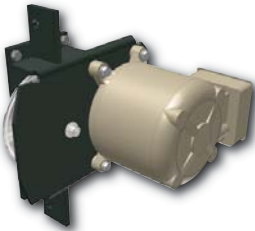

Quiet Stop

Metal to metal contact noise is eliminated by rubber gaskets.

Sound Deadening of Door and Cab Panels

Hoistway Door and Car Enclosure panels receive a coat of sound deadening material to eliminate metal vibration.

600 RPM Gate Motor

The slower Gate Motor produces less motor winding noise during operation, and offers more time for egress.

Sound Reduction of the fire lintel (If provided)

Metal to metal contact noise is eliminated by rubber gaskets.
