

Cart Friendly Car Gate Panel

Car Gate Panel does not hook shopping carts. Painted high visibility yellow.

Light Curtain (non-contact)

This is a non-contact reversing device, located at either side of the opening. Breaking the infrared beams will send the Car Gate Panel back into the fully open position.

Reversing Edge (contact)

This is a contact reversing device, located on the bottom edge of the gate panel. Any object that comes in contact with the reversing edge will send the Car Gate Panel back into the fully open position.

Safety Operation Labels

Operation Labels, located inside the car and on the hall side of the Landing Doors. Operation Labels demonstrate proper operation of manual and motorized doors and gates.

Reinforced Car Gate Rails

Gate Rails are manufactured from 3/16 in thick structural steel angle, and designed to withstand everyday abuse from loading and unloading.
