TECHNICAL BULLETIN
PREVENTATIVE MAINTENANCE REQUIRED

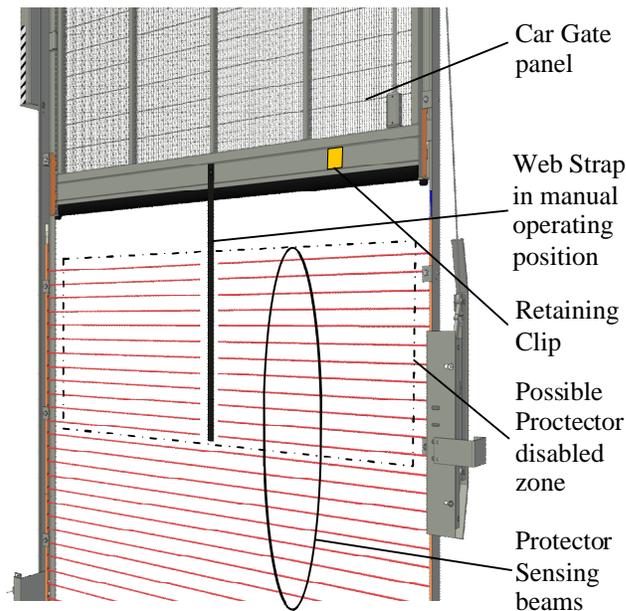

SUBJECT: Web Strap on car gate with Protector light curtain

EQUIPMENT: Peelle Web Straps (all sizes)

DESCRIPTION: Web straps are used on power car gates to manually close the car gate if power operation is unavailable. When a protector light curtain is installed in such an application and the web strap is not stowed properly, the web strap would hang down past the leading edge of the car gate panel. During power closing, the web strap could potentially disable the sensing area of the protector light curtain where the web strap hangs.

ACTION: Remove the web strap from the car gate panel.

PEELLE HELP: Please contact Frank Leo at (905) 846-4545 x230 for technical support.
