SLA OR STD OPERATION — DESCRIPTION

Set elevator controller drawings and follow the correct panel to panel connections for either SLA or STD operation control interface. Set or remove jumper 24A-24B as required.

NOTE: CONTROLLER CANNOT OPERATE IN BOTH SLA AND STD MODE.

SLA OPERATION

SLA operation is like a passenger door controller with retaining cam door open and close buttons are not used to the peelie controller. Light curtain reversal, fire service operation, and automatic closing are all handled by the elevator controller. Door unites and sequence opening and closing is done by the door controller using the SLA operation control interface initiatives.

[SQUARE BRACKETS] = PCL OR RELAY Indicator
